

# Compact device for air purification

VENTILATION SOLUTIONS

**ECO-FRESH**  
mini

## Creates healthy microclimate in the room

- Disinfects and filters the air
- Kills viruses and bacteria
- Eliminates mold spores and pollen
- Neutralizes odors and cigarette smoke

Coronavirus  
/ COVID-19 /

For  
permises  
up to **40m<sup>3</sup>**

**NEW**

**“Eco-Fresh” Mini** disinfects and purifies the air, providing modern and affordable way of achieving healthy microclimate at your home and office. The device is especially suitable for people suffering from asthma and allergies caused by dust, as well as for the equipment of hospital rooms, kids’ rooms and classrooms.

Two modifications **Eco-Fresh Mini** are being produced – **01** and **03**. Each of them offers the following options: **“Nature”**, **“Lux”** and **“Two speed”**.

The two-speed purifiers are very suitable for bedrooms, as they are extremely quiet. Using this device does not replace the need for fresh air supply to the premises!

Ventilation is a first-rate addition for air conditioners that regulate the temperature but do not change the stale air in the room.

## Areas of application

At school

At home

At the work place

In hotel rooms

In restaurants

# RECOMMENDED FOR RESTAURANTS

Creates a disinfection cloud of 1m. Protects against viruses and bacteria.

## High performance filtration system

Activated carbon filter, fine filter and/or HEPA filter capture fine dust particles, allergens of dust mites, pollen, mold spores, allergens from pets, bacteria, viruses, significantly reduces organic and residual odors.

## Generator of negative charged ions

The negative ion generator freshens the air, emitting a balanced amount of negative charged ions which have beneficial effect on human health. Air, rich in negative ions improves work capacity and helps in treatment of a number of health problems such as allergies, sinusitis, asthma, bronchitis, pneumonia, influenza-like viral diseases and accelerates recovery process after illness.

## Built-in economic fan

Ensures continuous circulation for filtering the contaminated air, which purified and saturated with negative ions is then returned into the room killing pathogenic viruses and bacteria.

- **Economical** – low energy consumption (17W).
- **Compact and comfortable** – easy portable, does not take space, requires no complicated maintenance and cleaning.
- **No side effects** - the process of air disinfection and purification is absolutely natural. No chemicals or noxious materials are used. The unit does not affect the temperature and humidity of the environment.

The level of toxic substances in indoor air is often **10** to **50** times higher than outdoors, and we spend almost all of our time in enclosed premises. The use of appliances for air disinfection and purifying and also of ventilation systems that provide fresh air with the “**ECO-FRESH**” brand name is an alternative to a new quality of life and health.

Creates  
healthy  
microclimate  
in the room

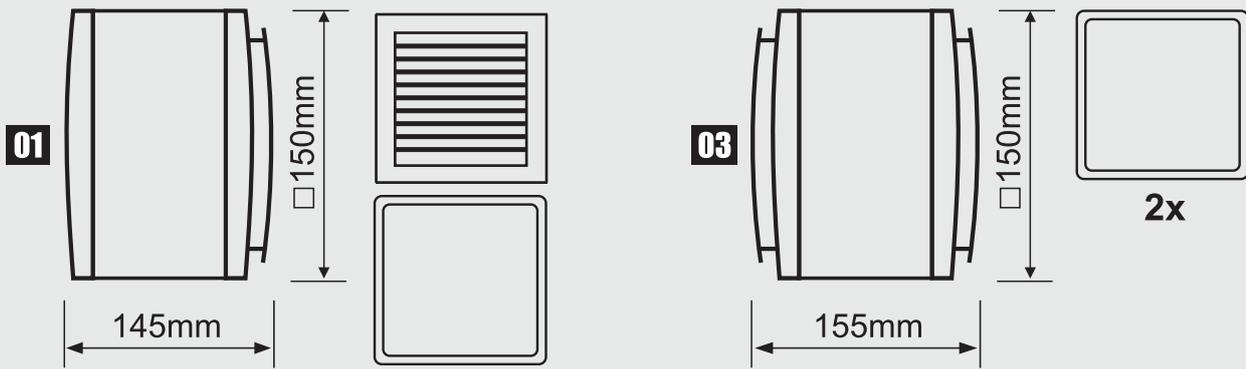

# NECESSARY FOR HOTELS ROOMS

Disinfects the hotel room  
within 60 min.
